Psoriasis is a long-lasting, noncontagious autoimmune disease characterized by raised areas of abnormal skin. These areas are typically red, or purple on some people with darker skin, dry, itchy, and scaly. Psoriasis varies in severity from small, localized patches to complete body coverage. Injury to the skin can trigger psoriatic skin changes at that spot, which is known as the Koebner ...

Psoriasis - Wikipedia

Psoriasis is an immune-mediated disease that causes raised, scaly patches to appear on the skin. Symptoms of psoriasis typically appear on the outside of the elbows, knees or scalp, though it can appear on any location. Psoriasis may look different for different skin types.

About Psoriasis from: National Psoriasis Foundation

If only it was that simple! We have all seen the claims "Spot free in 30 days" or "Our unique alkaline diet works wonders." Why pay \$20, \$50 or even \$200 for an unproven and unjustified psoriasis diet. There is no magic cure and numerous studies have been conducted on various published psoriasis diets and all have been generally disproved.
